Explanation of the tags:

- `<table>` : is used to create the timetable structure with borders and spacing.
- `<tr>` : defines table rows for each day.
- `<th>` : is used for headings like time slots and days.
- `<td>` : is used to enter subjects and activities.
- `colspan` : merges columns for lab hours.
- `rowspan` : merges rows for short break and lunch break.
- `bgcolor` : gives background color to break cells.
- `class="vertical"` : applies vertical text style.
- `style` attribute changes text color for specific cells.

2 . Aim: Construction of web page Displaying Each Syllabus of each Subject

Displaying as Image Format and also displaying the Corresponding time table of current semester
